INTRODUCING DAL SIN'S NEW GLOBAL MANUFACTURING SUPPLY SERVICES

Our new program provides customers metal fabrication sourcing options while also expanding production capabilities to best serve Dalsin customers with local and global needs. Using our network of high-performing global business partners, we are a single point of relationship management for global sourcing. The scope of this program starts with » a robust and diligent design transfer process which includes specification definition and standardization to local equivalent standards » Coordinating detailed manufacturing process reviews and creating a strong quality control plan » Adopting best practice tooling capability with lowest cost strategy » Using our vast experience to develop best packaging and logistics routing to ensure secure, on time and accurate deliveries. All this mirrored through Dalsin's standard operating procedures that have helped build our reputation as a leader in contract manufacturing.

It All Starts with World Class Manufacturing Capabilities...

There are five highly requested fabrication services that are the core of this program:

- Roll Forming - Heavy Gage (up to 5 gage)
- Roll Forming - Light Gage with specialty coated materials (PosMAC or Magnelis)
- Robotic Welded Assemblies (AWS D1.1 and D1.3)
- Precision Stamping Coupled with LCC Tooling (low-cost country)
- Coatings, HDG, E-Coat, Powder Coat, Epoxy and all other plating

But That's Just the Start - Dalsin's Robust Capabilities Include:

Project Creation: Detailed understanding of scope and specifications, transferred to our partners to ensure we get it right the first time. Local support for design and engineering needs can improve options and help to reduce costs and add value to our customer. Program management and 24hr communication and feedback loop.

Sourcing: World Class Global Supply partners allow us to select the best performers for your project. With strong visibility into the global market and pricing landscape we select the right partner to get you the best price for raw materials and production, while meeting your timing needs. We consider all aspects including landed cost.

Production Services: Quality management throughout: PPAP through Production. Project assignment to the best partner based on capabilities and availability.

Logistics: Proper documentation insures seamless trans-shipment. Proper packaging based on shipment modes and job site requirements. Transport to remote locations.

Inventory: Safety stock of materials for high-volume parts. Raw material stock managed in a flexible state.

Improve Your Products and Your Financial Performance

Dalsin's Global Manufacturing Supply Services program follows the "virtuous cycle" model, where high performance at each step contributes financial benefits to following steps. The more you use Dalsin's program, the more successful your program will be.
